

### Electric Cell Signaling Patient

"I've been coming to National Neuropathy Center for my knees for several weeks now. When I first came in I had a lot of knee aches and pains. Just regular walking was a problem. Now things are great! No pain!! I am walking a lot and able to do my job better. The office staff is excellent! I highly recommend this treatment and the National Neuropathy Center."

**If You Have Questions We Have Not Answered Please Ask Us.**

Day	Hours
Monday	8:30am - 6:00pm
Tuesday	1:00pm - 6:00pm
Wednesday	8:30am - 6:00pm
Thursday	8:30am - 6:00pm
Friday	8:30am - 1:00pm
Saturday	Closed
Sunday	Closed

# Questions About Your Neuropathy Treatment

**National Neuropathy Center**

*Solutions Start Here*

## YOU HAVE QUESTIONS

Welcome to the National Neuropathy Center. Electric Cell Signaling is one of the most revolutionary treatments ever discovered in medicine. We are excited for you to have an opportunity to undergo treatment and reap the benefits. We have tried to answer some of the questions we hear most often and hope this helps you get comfortable with your treatment in our center.

### HOW LONG BEFORE I FEEL A DIFFERENCE?

It is difficult to say how long it takes before you begin to notice a change. Everyone's body heals differently, and everyone has different reasons why they need care. We typically tell patients you may not feel a difference within the first month but have many patients feel better after the first few visits.

### CAN I AFFORD TREATMENT?

Cell Signaling is covered by all insurances including Medicare. Some patients may have a high deductible or copay. If necessary, we finance treatments using a third party which requires NO credit checks and all are approved.

### WHAT IF I HAVE TO GO ON VACATION OR CANNOT MAKE APPOINTMENTS FOR A SHORT PERIOD?

We are happy to schedule around life events that pull you away from treatment. However depending on your specific case, we may have to backtrack some treatments. It is situationally dependent.

### WILL MY SYMPTOMS RETURN ONCE MY TREATMENT IS OVER?

Depending on the type and cause of your Neuropathy maintenance treatment may be necessary. Your condition is re-evaluated part-way through your care plan. If additional maintenance is required your Doctor will provide you with this information while undergoing treatment.

### WHAT IS THE SCHEDULING POLICY?

We recommend you schedule your visits two weeks in advance. Our available time slots fill up quickly. Getting your preferred times on our schedule two weeks in advance will assist in keeping your treatments consistent.

### I AM ON METFORMIN CAN I BE TREATED?

Yes. However, a side effect of Metformin is Neuropathy. We have an inexpensive program to offset the side effects of Metformin. We highly recommend our Metformin Cleanup Program while also undergoing Cell Signaling. Ask us how this program will benefit you.

### WHAT IS THE CANCELLATION POLICY?

We require 24-hour notice to cancel an appointment. If notice is not given we do charge a \$50 fee. When appointments are not kept the patient does not get better and appointments are taken away from other patients.

### WHAT DO I DO BEFORE MY FIRST VISIT?

This is very important! During your first visit there will be a test of your Cardiovascular and Central Nervous System. Therefore, DO NOT: eat one hour before the first visit; exercise, drink alcohol or caffeine. No bathing 1 hour prior and no smoking within one hour of your first visit.

### HOW DOES CELL SIGNALLING WORK?

Cell Signaling works by using a two-part approach. 1) A micro-injection of a vitamin and mineral mix designed specifically to heal tissue. 2) A Patented resonate AM/FM energy wave which mimics various pathologies in the body. What look like suction cups produce the AM/FM frequencies which signal cells to heal by encouraging blood flow to the capillaries and regenerate your nerve endings which in turn relieves the pain.
